Two Projects Now Under Way For Drouth Area

Program of Work For Roads And Conservation Dams

Decision to initiate two important projects for assistance to settlers in the drought areas of the province has been made by the provincial government this week. One of these projects is the initiation of a program of works in the municipalities and improvement districts in the dried out areas, to be financed by the provincial government through the municipal authority, in such a manner as to give the greatest benefit to the farmers of these districts. This program will include not only the construction of roads throughout the municipal districts concerned, but also the construction of dams for the conservation of water for stock in the area most seriously affected by drouth conditions.

The other project is in connection with the disposal of cattle in the hands of settlers in the drouth districts. From information in the hands of the government there are some 2½,000 or 25,000 head of cattle to be disposed of. Some of these have already been sold at unfairly low prices. The government hopes to initiate arrangements whereby some of these cattle will be disposed of, the low grade stock going to packers for processing, while it is hoped to be able to sell the more desirable stock to those who have feed in the northern districts.

Details for both the above projects are still to be worked out but the general policies have been decided upon.

Mr. Hoadley, in announcing these plans, made it plain that while decisions affecting other parts of the province had been arrived at during his Ottawa negotiations, also that Ottawa authority had been obtained to proceed with the usual arrangements again this year under the free freight policy for movement of settlers, movement of cattle out or movement of feed into the dry area.

ARE TO RESUME THE TRAVELLING CLINICS

Work of the travelling clinics is to be resumed in this province after a lapse of two years. Under the directions of the department of health the work is being organized for a period of two months. The clinic will serve various remote districts in some of which the only health assistance is that provided by a district nurse. The clinic will deal with many ordinary cases that develop during the year, including tonsil troubles, adenoids and minor surgery.

Dr. and Mrs. Ward left Sunday for a two weeks vacation at Edmonton and Sedgwick.

After cutting and burning the weeds on Broody avenue the main thoroughfare now presents a clean, tidy appearance. It resembles a man who has just had a fresh hair cut.

Tennis Tournament Proved Great Success

Players Hold Social Event Last Monday

Great interest was shown in the tennis tournament staged in town last week by the young people of the town. There was a long list of entries for the different events and each was most keenly contested. Several of the contestants showed considerable skill in this line of sport and should put up a good argument in any tournament.

The schedule is not yet completed but it is expected the finals in the mixed doubles and men's singles will be played off this week-end.

So far the winners are: For ladies singles Miss Elsie Frey. The final was between Elsie and Miss Orpha Bezier and was one of the most stubbornly contested of the tournament. Each had a set to her credit and the deciding one went 11 to 9 for a finish. In the ladies doubles Elsie Frey and Orpha Bezier won out, defeating Miss Irene Buchholz and Miss Jean Moore in the finals.

In the men's doubles Dan Jensen and W. Paterson defaulted to L. Henderson and W. Lawson in the semi finals and Henderson and Lawson won the final from R. Findley and L. Vernon.

The committee in charge are to be complimented for the successful manner in which the tournament was conducted and they wish us to thank all who helped make it such a success.

After the games on Monday a social evening was held in the I.O.O.F. hall where cards and dancing were indulged in, and and a most enjoyable time was had.

During the evening the prizes were distributed to the winners.

Mr. and Mrs. Rae, of Calgary are at present here visiting Mrs. Rae's parents, Mr. and Mrs. A. Paterson.

It may not be assumed that the young bride worships her husband because she places burnt offerings before him three times a day.—Frank Vizelly.

* * *

Many a girl who spends all day splashing around in a swimming pool, can put on an awful argument about water spoiling her hands, when asked to bath the dishes.—Springfield Union

East Gas Well Being Cleaned And Cemented

Good Idea if All Gas Wells Were Looked After

Work is well under way this week on the east gas well belonging to the local gas company.

The well is being thoroughly cleaned and when this is done it will be cemented in compliance with the regulations governing such wells.

The main object in having this work done is to keep this gas field in good shape to corral the gas as much as possible and as a safeguard against allowing the field to become contaminated in any way.

It would be a good idea if all gas wells in town in connection with the different industries were looked after and it were seen to that they are kept in good condition.

"Scarlet Empress" Taken from Diary Of Russia's Queen

Marlene Dietrich's newest starring picture, the Josef Von Sternberg production, "The Scarlet Empress," Monday at the Monarch theatre, is taken from a diary of Catherine the Great, Russia's most colorful and exciting Empress.

Two centuries roll back on the screen and Catherine the Great lives again. All the splendor, the barbaric civilization of decadent Russia, the bizarre splendor of history's most exciting court are brought to the screen by the superb acting and personality of Dietrich and the direction of Von Sternberg.

Here for the first time, movie fans get a picture of the real Russian Empress who ruled a mighty empire with her brains and her beauty.

WHO IS AT FAULT

The world gets queerer and queerer and folks get stranger and stranger. At least that is what one of the Review reporters thought who was in attendance at the tennis Dance in the I.O.O.F. hall on Monday night.

The floor was fine, the music was good. The hosts had done everything possible to ensure an enjoyable evening. The girls and young ladies were among the prettiest we have seen for a long time. The young men were numerous and on the whole smartly turned out. The setting looked perfect for a wonderfully enjoyable evening. And yet the girls sat and sat against the wall waiting for the young men to ask them to dance. But the young men just stood at the door and allowed the music and the time to go to waste. The floor manager, Mr. Bert Podesta, made heroic efforts to pry the young men loose from the door way, but to no avail. They stuck and stuck, and stood and stood and smoked and smoked and chewed and chewed — gum. Naturally we wondered what could have brought about such a change in people in so few short years. It seems but yesterday, that not a minute of time or music would be lost if there had been a setting even half so good as the one prevailing on Monday evening. One didn't expect a five piece orchestra and a marble floor for wall flits in those days. Could it be that the long beloved pastime of dancing was dying out? And yet there was a splendid crowd the other night. What did they come for if not to dance?

Is it true that today girls are willing to pay their own way to a dance and then sit against the wall for the most of the evening? Is it true that young men today are willing to squander a two bit piece, simply to go and stand all evening and look at the girls? If so, times certainly have changed.

Now, either the young men or the young ladies are at fault for this sad state of affairs. We leave our readers to judge for themselves.

Are our young men so lacking in good manners or so outwardly selfish that they give a thought whatever to making others happy or even sparing their feelings. It is bad enough to be a wall-flower if one is old and homely but to be young and pretty and still decorate the wall is past endurance.

But then again it might be the girls' faults that things are as they are. It used to be the custom in the good old days referred to previously in this article, for a young lady to attend dances only if and when accompanied by an escort who has not only personally invited her to be his partner but has considered her company so desirable that he was willing to pay for her admission fee. But we understand this custom does not prevail today. The girls pay their own way, go unescorted and get home as best they may. There is just a possibility that the girls in their desire to make it easier financially for the young men, have deprived them of the opportunity and the desire to be responsible for the girls' pleasure.

In our opinion, if the girls would not attend dances unless they were invited and paid for by individual escorts who were men enough to realize that it was their duty to see that the girls had a good time, there would be no repetition of the condition that prevailed at Monday evening's dance.

Crop Report Issued By Agricultural Dept.

Harvesting of Alberta's crops has been pushed rapidly to conclusion during the past two weeks under ideal weather conditions which have prevailed over the entire province with the exception of a brief cool, wet spell on August 30th, which was general. Cutting is fairly well completed in most of the central and southern districts and is well advanced in the northern sections.

While a conclusive estimate of the 1934 wheat crop will not be possible for some time yet there is sufficient information in hands of the department to establish fairly definitely that the average wheat yield over the seeded area of the province will be considerably below the average for the past two years namely, 17 bushels per acre.

The estimate of the area seeded to wheat in Alberta this year is placed by the Dominion Bureau of Statistics at 7,501,003 acres, compared with 7,898,000 acres in 1933, and 8,201,000 acres in 1932.

School News

School re-opened on Tuesday Sept. 4th. with a large attendance. Officers for the High School Literary Society were elected as follows: Pres., Lillian Lanning. Vice Pres., Keith Elliott. Treas. Margaret Rutherford, Editor Jean Paterson.

Each member of the executive chose a team of 10 pupils, which will compete in different events during the coming year. The second meeting of the society will be held on Friday when all business will be discussed.

Glass Plant is Kept Busy Filling Orders

Growing Demand in The West For Glass Containers

Business continues brisk at the local Glass Plant. This plant has had an exceptionally busy season and prospects are promising for the future.

Glass ware of all kinds appears to be in great demand throughout the west and the local plant has been shipping goods as far as Ontario.

There has been an increasing demand for preserving sealers for domestic use during the past few years and industries for the manufacture of products for table use are more and more using glass ware as containers both for cleanliness and as a better means of displaying their goods. As a result the local plant is kept busy twenty-four hours a day to keep up with the growing demand for this class of goods.

Fun-Melody Film Features Bernie's Band

Ben Bernie and his lads make their screen debut in "Shoot the Works." the Paramount feature film which will be shown on Thurs. Fri. and Sat. at the Monarch Theatre.

Surrounded by a fine cast, headed by Jack Oakie, Dorothy Dell, Arline Judge, Alison Skipworth and Roscoe Karns, Bernie's orchestra plays six new hits, arranged by the combined teams of Rainger and Robin and Gordon and Revel. They include "With My Eyes Wide Open I'm Dreaming," "Do I Love You?" "In The Good Old Winter Time", "Take a Lesson from the Lark" "Were Your Ears Burning?"

"Shoot the Works" is a comedy - melody - romance about a broken - down side - show troupe the Nicky Nelson Enterprises which survives extinction because it has a flagpole sitter and a stuffed whale.

Jack Oakie as Nicky Nelson, is preparing to launch a vaudeville act with Arlin Judge. With the aid of Bernie and his "lads," they manage to win fame and fortune.

Miss Nora Mitchell, of Medicine Hat, is spending a few days with Mrs. R. C. Hargrave.

* * *

Mrs. Lakey, nee who has been visiting in Medicine Hat for some time, returned to town this week.

* * *

The Baby Clinic, postponed on Wednesday, Sept. 5th will be held on Monday, Sept. 10th. Please note the change in day.

* * *

Mrs. Alex. Gray and children, of Medicine Hat, were visitors with Mrs. Gray's parents, Mr. and Mrs. Harry Johnson, on Wednesday.

* * *

A party of young people from Medicine Hat assembled at the home of Mrs. R. C. Hargrave on Monday evening. Miss Zannie Murray, who is leaving shortly for Calgary to attend Normal School, was the guest of honor.

"Fresh from the Gardens"

This Changing World

Probably no period of recorded history can show such a succession of surprising and kaleidoscopic changes, political and economic, as that through which we are passing. The vast complex of peoples and nations comprising the civilized world to-day is in a state of uniformly unstable equilibrium —an equilibrium disturbed from time to time by a variety of insurgencies both major and minor. So frequent are they, so unexpected their character, so far-reaching their effects, that few even of the great among the prophets dare risk portraying the face of things to come in the immediate future. They feel safer in making (and indeed they prefer to make) their predictions at long range, and to envision a world more remote in time than that which is likely to concern much the present much-abused generation.

The political and economic changes which occurred during the storm years of 1914-18, the revolutionary upheavals which wrecked dynasties and brought new state forms into being, probably were larger in scale. But they were not so numerous nor, for that matter, did they strike with ruder shock than those of more recent occurrence. The protracted strain of the war itself served to dull and deaden the sensibilities of the people directly subjected to it, and, more inured to shock, they were inclined to lump all the catastrophies into one—the War. They were inclined, too, to the belief that, once peace were restored, the world would quickly revert to the pre-war basis and settle anew to the ordered routine which seemed so stable until the unexpected happened at Sarajevo.

The world, however, has refused to settle down, refused to revert to the former status. The well-ordered machine which made this seem the best of all possible worlds until the summer of 1914, has never regained its old momentum. The people hanker for peace and a chance to routine their existence. They wish to remodel the new world on something like the old lines. But peace is denied them—peace, security and comfort, the comfort which comes from an assured livelihood. All is unrest. They feel they sit upon a volcano about to erupt, and nerves agitated by uncertainties make them the more susceptible to the recurrent shocks which evidence the turmoil beneath. Thus the crises of the depression appear more menacing than those which occurred during war-time which stunned, rather than agitated.

Recent events in Austria and Germany are symptomatic of the times. The world looks on with anxiety while these two nations writhe in their efforts to evolve a state form which can bring harmony and happiness to their peoples. Equally significant to the world at large, however, are the experiments being tried in the United States and in Great Britain to evolve a new economy which will give work to the workless and restore the prosperity both, in the past, have enjoyed. Both experiments involve complete revolutions in the national economic life of those countries, but few would agree that either yet had found the solution within itself.

It is unnecessary to enumerate the many changes during the period of depression. Books on political and economic subjects become obsolete in a day. Anyone who reads knows that. Take, for example, the following quotation from a book which reached shelves of public libraries in Western Canada little more than a year ago:

"Nobody doubts, for instance, that America will overcome the present difficulties once it gets a grip on itself. France is sitting comfortably, and even Germany is held to have a fair chance . . . . But the issue is more doubtful for Great Britain because her malady seems more fundamental. Already, the British Empire has fallen from its former high estate."

The picture has been entirely reversed since then. Scarcely a statement in the quotation stands to-day—and that is but a sample of the dangers besetting the would-be prophet in this dynamic, fluid world. Apparently, the unstable condition will continue until every nostrum and every alleged cure-all has been tried and tried in vain. Then perchance, a world on the verge of ruin will realize that it is not so much the medicine that is wrong as the diagnosis. Indeed, were international enmity replaced by international amity almost any kind of political or economic medicine might cure remaining ills.

Realises Its Value

Governor-General Is Patron To Junior Farm Clubs

Club members and everyone associated with club work for farm boys and girls will sincerely appreciate the great honor that has been accorded to the junior farm club movement by His Excellency the Governor-General, the Earl of Bessborough, who has extended his patronage to the Canadian Council on Boys' and Girls' Club Work.

The recognition that His Excellency has thus given to the value of junior club work in Canada should encourage greater activity on the part of every club member and stimulate a deeper sense of the opportunities that are provided in this form of agricultural extension.

Up To The Architect

Instead of saying that man is a creature of circumstances, it would be nearer the mark to say that man is the architect of circumstance. It is character which builds an existence out of circumstance. From the same material one man builds palaces, another hovels, one warehouses, another villas. Bricks and mortar are mortar and bricks until the architect can make them something else.

Criminals Steal Arms

1,027 Guns Taken From U.S. Armories Since 1923

The underworld has stolen 1,027 guns—ten of them machine-guns—and 23,110 rounds of ammunition from national guard armories in 29 states since January 1, 1932. William Stanley, acting United States attorney-general, gave the information.

At the same time he revealed the department of justice has asked the war department to prevail upon state governors to end these thefts. Stanley reminded that the federal machine-gun law which took effect recently, is intended to close fire-arms channels to the criminal.

Grain Duty Free

Under the authority of the Reich cereal organization, rye, wheat, barley and oats in all quantities may be imported into Germany duty free until July 31, 1935, according to the decree issued by the ministers of finance and agriculture. However, it was believed the cereal organization is only likely to permit imports when a shortage in Germany is acute.

Nearly $170,000,000,000 of American money is privately invested in foreign countries.

Diarrhoea, Dysentery, Colic Cramps and Stomach Pains

Prompt treatment with Dr. Fowler's Extract of Wild Strawberry in such cases relieves the pains, checks the looseness of the bowels, and thus does away with the suffering, the weakness, and oftentimes the collapse associated with attacks of this kind.

It does this by checking the too frequent and irritating stools, settling the stomach, and bracing up the weakened system, thus making it a remedy for the treatment of bowel complaints of both young and old.

On the market for 88 years—you do not experiment when you use it.

Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

DR. FOWLER'S EXT. OF WILD STRAWBERRY

Seeking New Height Record

Wiley Post Will Use Flying Suit He Invented

With a specially constructed flying suit of his own invention, Wiley Post, world-circler, will soon take off in an attempt to better the present altitude record of 47,352 feet.

His well-known companion, the "Winnie Mae", a ship almost as famous as Lindbergh's "Spirit of St. Louis", has been remodelled with the addition of a new 420-horse power motor and two superchargers so that her speed is expected to be increased to 350 miles per hour at ordinary altitudes, and seemingly impossible velocities in the stratosphere where air resistance approaches "nil".

Post's flight is not primarily for purposes of breaking records, but to test his airsuit, he has announced.

"Engineers have always said if we had a variable pitch propeller and a super-charged motor we could fly in any altitude if the body could function normally," Post explained. "Well, we have the propellers and the superchargers and I believe this suit will conquer the last obstacle."

The suit consists of rubberized fabric trousers covering the entire trunk of the body up to the shoulders and a rubber top piece capped by an aluminum head gear. The wearer will get air through the supercharger, which also supplies the motor. The suit, of course, is air-tight.

Post hopes to get enough information in his initial test to aid him in winning the $50,000 London-to-Australia derby next October.

The water ouzel is the only song bird that has learned to dive into the water for its food.

Rock Slide At Niagara

Huge Chunk Weighing Thirty Million Pounds Goes Over The Falls

A gigantic pile of rock estimated to weigh 30,000,000 pounds rose above the water in Niagara gorge recently, visible evidence of the second major rock slide from Horseshoe Falls since 1931.

Water was flowing over what was dry rock as sightseers thronged to the shore of Goat Island in an effort to obtain a view of the jagged, saw-like rim of the falls and the huge pile beneath it. But mist obscured the view, shrouding the secret of Nature's wonder.

The huge chunk fell from the cataract with a deafening roar that seemed to still the sound of water pouring over the precipice. The rock landed in the gorge, sending a spout of water more than 300 feet into the air.

The lip of one of Canada's great wonders lifted as if from a charge of dynamite, heaved, groaned and slid away with a roar. Where there was only a dribble of water a huge stream began to pour.

Niagara Falls, in its recent break, demonstrated a geological belief that this scenic wonder is only the last of the American Niagaras, and like the others, is headed towards extinction within perhaps 20,000 years.

Brazil is chiefly an agricultural country and the diversity of climate facilities the cultivation of practically every agricultural product. Nevertheless, Canada in the fiscal year 1933-34 exported $327,511 worth of agricultural and vegetable products to Brazil, including wheat and showing an increase of $202,108 on the preceding year.

British Dominions Emigration Society

Secretary Returns To England After A Visit To Canada

Concluding his forty-second visit to Canada from Britain, Robert Culver, secretary of the British Dominions Emigration Society, returns on the Cunard White Star liner Ascania from Montreal.

"I am impressed," declared Mr. Culver in an interview, "with the improvement in Canadian business conditions over last year. There are many signs of material progress and a feeling of returning confidence among influential people I have met here this year. I feel that before long we shall have a greater opportunity of increasing the work of our society in the Dominion."

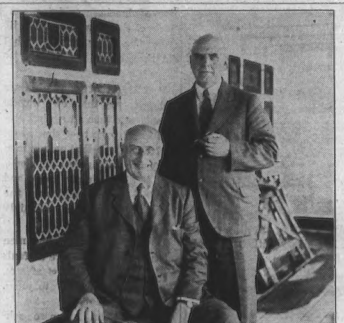
"The British Dominions Emigration Society was founded in 1882 by Prebendary Kitto. During these 52 years over 87,000 have been assisted to emigrate, and the feature of the work I am most proud of is that we have never charged one cent interest on the money advanced. It was not surprising therefore, though most gratifying to our society, to receive a commendatory letter from your Prime Minister, the Rt. Hon. R. B. Bennett, paying warm tribute to our work upon the occasion of our 50th anniversary. At the present time our work is almost entirely confined to the re-union of British families."

The society enjoys the high presidency of H.R.H. Princess Louise, Duches of Argyll, and a list of distinguished vice-presidents which includes The Most Noble the Marquess of Salisbury, K.G., G.C.V.O.; The Right Hon. and Right. Rev. The Lord Bishop of London, The Right Rev. The Lord Bishop of Stepney, The Right Hon. Lord Lloyd, The Right Hon. Lord Middleton, Sir Archibald Weigall.

The society's Canadian manager is R. Gordon Burgoyne of Montreal; the local committee includes many business and professional leaders.

Committees of similar calibre cooperate with the society in Toronto, Halifax and Saint John, N.B.

Assistance to emigrate takes the form of grants or loans made under varying conditions to suit circumstances, to British-born subjects of good character and sound health; also of advice and help to settlers after their arrival.



Robert Culver and R. Gordon Burgoyne of the British Dominions Emigration Society, who returned to Britain on the White Star Liner Ascania

"It has been found by our representatives in Canada," Mr. Culver said, "that large numbers of men go out, leaving their wives and families behind, with every hope and good intention of soon being able to send for them. They make good in the various cities and towns throughout Canada, but very quickly find that after keeping themselves and sending money home to help to keep their wives and families in Britain, it is utterly impossible for them to save the amount required to bring their wives and families out. One of two things is then bound to happen—either the men have to throw up their good permanent work in Canada and return to the Old Country to swell the ranks of the unemployed there, or they have to receive assistance towards the cost of the transportation of their wives and families. We are very glad indeed to be able to take up this work, which we feel is of considerable importance."

Makes "Color-Music"

Attachment For Piano Invented By English Engineer

I. Shamah, English electrical engineer, has invented an apparatus for making "color-music" which may be used in any home as an attachment to a piano. By means of this, a drawing room may be flooded with diffusing lights which will automatically react in colors to whatever tune is played. He has so graded the vibrations of a piano in proportion to each other that each note has its own exact shade, so that it will be possible for instance, to play "God Save the King" in a combination of shades varying between red, white and blue; the "Blue Danube" in green and blue, or the "Moonlight Sonata" in yellow and silver. Another invention by Mr. Shamah enables one to "feel" music. You hold two metal tubes and when a tune is played you feel the rhythm of it like a beating pulse, which send a pleasant tingling sensation up the arms.

Telephone Of The Future

Eighty-Three-Year-Old Scientist Working On Improvements

Sir John Ambrose Fleming, a celebrated scientist who has had a good deal to do with the development of telephones, is the inventor of the thermionic valve—which made wireless telephony possible. "In a few years' time," he said the other day, "we shall probably chuckle over the recollection of what telephones were like in 1934. Everybody knows that the telephone is in its infancy; everybody knows that it can be improved enormously. What form will that improvement take? I am a scientist, not a prophet. The telephone may be a little box that you can carry in your pocket. It may become more elaborate than it is today. I do not choose to prophesy. I'm certainly not going to tell you on what lines I am working now to improve the telephone." Sir John Fleming is 83, and a very busy 83.

Making The Roads Safe

British Courts Do Not Handle Reckless Drivers Easily

British courts are ruthless with motorists who carelessly endanger the lives of others. Kaye Don is under sentence on this account, and another example is to hand in the sentence of a girl, recommended to mercy by the jury and therefore getting off with half the term the judge had intended to impose, sent to jail for six months for manslaughter. She said she had been ill and took some gin to relieve the pain, and had had three bottles of beer as well as the gin. Her driver's license was revoked and she was disqualified for life from driving. That is the way to make the roads safe.—Hamilton Herald.

Made Fast Trip

A homing pigeon, owned by Arthur Milner of Sault Ste. Marie, made a hop of 501 miles from Minneapolis to Sault Ste. Marie, in 25 hours. Released at Minneapolis one day at 9 a.m., the bird arrived at 10 a.m. the next day.

Bridge and bridge tournaments are regarded as gaming in England.

The First Motorcycle

Fiftieth Anniversary To Be Celebrated In Germany This Year

The fiftieth anniversary of the first motor-cycle is to be celebrated this year; a monument is to be erected to Gottlieb Daimler, in Schorndorf, Germany. Working behind the shutters of a shop in Stuttgart, Daimler and Wilhelm Maybach made the first motor-cycle, and in the same year the first motor-boat was launched in the river Neckar, a tributary of the Rhine. Believing the inventors were manufacturing counterfeit money, the police raided their workshop, and as there was considerable public fear of petrol, wires mounted on porcelain insulators were placed around the premises to give the impression that the motive power was electricity. In the following year the first "horseless" carriage left the shop. It was an ordinary horse-drawn carriage with metal tires in which one cylinder of 1½ horsepower was mounted. It achieved a speed of eleven miles an hour.

A Pulpit On Wheels

Sexton Places It Where People Can See Minister

In the Church of St. James, Clovelley, is a pulpit on tram lines. The pulpit which existed before 1888, was very high and ugly, so it was decided to cut it down to its present proportions. When placed in a certain position in the church it concealed the altar, and when in the only other suitable position, people in the gallery could not see the preacher. Now, before the sermon, the sexton pushes the pulpit on its lines to the centre of the church, and after the sermon it is pushed back again.

Gigantic Wine Cask

Heidelberg's famous cask will be a mere barrel compared to a wooden giant under construction at Bad Duekheim, Germany, and destined to be the world's largest wine vat. Resting on foundations of concrete it will have a capacity of 350,000 gallons, against the mere 50,000 gallons of the Heidelberg barrel.

OFF COLOUR? HOW IS YOUR LIVER?

Wake up your Liver Bile —Without Calomel

Your Bowels are very small organs, but it certainly can put your digestive and eliminative organs out of kilter, by refusing to pour out its daily two pounds of liquid bile into your bowels. You won't completely correct such a condition by taking salts, oil, mineral water, laxative candy or chewing gum, or roughage. When they've moved your bowels they're through—and you need a liver stimulant.

Carter's Little Liver Pills will soon bring back the golden tint into your life. They're purely vegetable. Safe. Sure. Ask for them by name. Refuse substitutes. 25c at all druggists. 68

Has a hundred uses. Always have a box in the kitchen.

Premier Mitchell F. Hepburn, of Ontario, renewed his demands for monetary reform before a meeting in honor of Hon. Dr. Leonard J. Simpson, minister of education, and declared Australia had practically settled her economic problems, so Canada could do the same.

Little Journeys In Science

AMMONIA

(By Gordon H. Guest, M.A.)

Ammonia is a colorless gas which has a characteristic, pungent, powerful odor. It is about one-half as heavy as air and is very soluble in water. Ammonia gas is easily changed to a liquid. At ordinary temperatures a pressure of about 66 pounds per square inch is sufficient to liquefy the gas.

Ammonia will neither support combustion nor burn in air. Although inactive when dry, ammonia will, in the presence of a small amount of moisture, react with acids to form substances known by the chemist as ammonium salts. For example, on mixing the fumes of hydrochloric acid, which is known commercially as muriatic acid, with ammonia a heavy white cloud of ammonium chloride is formed.

Liquid ammonia is used very extensively in making artificial ice and in producing the low temperature required in cold storage plants. This use of ammonia depends on the fact that it can easily be liquefied at ordinary temperatures by applying pressure. When the pressure is released the liquid ammonia evaporates, absorbing a great deal of heat from the surroundings. This evaporation usually takes place in pipes surrounded by a solution of salt which is not easily frozen. This cooled salt solution may be piped to a cold-storage room, or cans of fresh water may be immersed in it to produce ice.

Ammonia gas is very soluble in water and is therefore usually sold in water solution under the name of "aqua ammonia", which is used as a cleanser both in the home and in the industries. Large quantities of ammonia are used in the manufacture of fertilizers, and in making ammonium compounds such as smelling salts.

The range of the total weekly wages, including cash and allowances, of married ploughmen in the various divisions of Scotland is as follows: In the southern counties, from $7.84 to $9.30. In the lower Clyde valley, $8.84 to $9.48; in the remainder of the central area, $7.98 to $10.20; and in the northern and northeastern counties, $6.74 to $7.58. In Scotland as a whole, a single ploughman's weekly wages is $6.76.—Scottish Journal of Agriculture.

New mine cages, built of aluminum, enable men to descend 1,500 feet deeper than formerly; the new cages are 40 per cent. lighter than old types.

Not What They Seem

Many Things Have No Association With Their Name

Cork legs are not made of cork. They are made of wood, metal, leather, or strong canvas; they were invented by Dr. Cork. Hackney coaches are not so called because they were first made in Hackney, London. The word comes from the French "Haquenee," meaning an ambling horse. Brier pipes are not made from the roots of the sweet briar. The name is derived from the French "Bruyere," meaning heath. Dark blue and light blue are not the colors of the Universities of Oxford and Cambridge respectively. A university has no colors. But members are entitled to wear the university badge. Dark blue and light blue are the colors of the athletic clubs of Oxford and Cambridge. A laughing jackass is not an animal; it is a bird. Cinderella did not wear a glass slipper. She wore a fur slipper, but the original French words were "Pantoufle en vair," and the sound was mistaken for "Pantoufle en verre"; thus "fur" was changed to "glass".

552

LOVELY IN - BETWEEN - SEASON WEAR SO YOUTHFULLY SMART AND SO SIMPLE TO MAKE

One of the new novelty rayon crepes in light evergreen coloring was chosen for this very smart looking dress. You will note its interesting collar. It is white bengaline silk.

The V-neck and centre-front skirt seaming are exceptionally slimming qualities, rendering this a model for normal or heavier figures.

One of the new heavy crepe silks, black crepe satin or crepe marocain can be used equally well. Lightweight woolens are also suitable, particularly the new novelties with a glint or metal in its weave.

Style No. 552 is designed for sizes 16, 18 years, 36, 38, 40 and 42 inches bust. Size 36 requires 3½ yards of 39-inch material with ½ yard of 35-inch contrasting, 2¼ yards of plaiting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Owing to heavy losses during storage and transit of Australian pears to the United Kingdom, the Australian government has under consideration a plan to provide for the ripening of pears on arrival in Great Britain. This would be a practice similar to that adopted for bananas which are shipped green and ripened on arrival.

Atlantic salmon, unlike those of the Pacific, do not die after spawning.

Christmas Seal Campaign

A.C.T. To Aid Saskatchewan Anti-Tuberculosis League In Worthy Effort

The Associated Canadian Travellers, with a membership of close to five hundred, and clubs in five of the leading cities of the province, have joined forces with the Christmas Seal Sale committee of the Saskatchewan Anti-Tuberculosis League and their entire membership for two months this fall will boost the sale of sheets of these cheerful little stickers, the revenue from which is accomplishing such gratifying results in the prevention of the spread of tuberculosis in Saskatchewan.

This alert organization, being desirous of associating itself with some humanitarian cause in which every member could actively participate, is determined to make this effort a real success. Its membership in five of the leading cities of the province have whole-heartedly signified their approval of the Christmas Seal Sale as a major activity, and on September 1st will initiate a campaign that is designed to enlist the support of the entire business community of the province.

While the generous manner in which wholesalers and retailers have supported the Christmas Seal Sale in the past is fully realized and appreciated, it is also felt that the response would be much greater if the purpose of the sale was fully understood and that a larger group of people would be reached by a canvass such as the Associated Canadian Travellers have volunteered to make. Personal contact means a great deal in any effort and this will be provided by the A.C.T. members, each of whom will be supplied with a pamphlet giving full information regarding the work of the Saskatchewan Anti-Tuberculosis League and the all-important preventive work that is made possible by the sale of Christmas Seals.

The information contained in this pamphlet is of vital interest to every resident of Saskatchewan. Here are some of the facts in a nutshell:

The tuberculosis death rate in Saskatchewan has been reduced 25 per cent. in the past four years.

The cost of treatment in Saskatchewan Sanatoria was over $200,000 less in 1934 than in 1930.

Since preventive work was commenced in 1928, a total of 29,673 persons have been examined at the expense of the Christmas Seal Preventive Fund.

Proceeds from the sale of Christmas Seals provides the funds for preventive work. This discloses cases in their early stages, making recovery more certain and reducing the period of treatment and the cost to the taxpayers.

The money raised by taxes for the maintenance of the three Saskatchewan Sanatoria is for treatment only; the money for preventive work is raised by the sale of Christmas Seals.

Prevention of tuberculosis and the protection of the well from infection is equally as important in the fight against tuberculosis as the cure of those suffering from the disease.

During 1933 there were three hundred deaths from tuberculosis in Saskatchewan. During the past six years one-third of all deaths from infectious diseases in this province have been due to tuberculosis. It is now the most fatal of all infectious diseases.

The education of everyone regarding the control of tuberculosis.

The provision of clinics for the examination of all persons having symptoms of tuberculosis, who are suspected by their family doctors of tuberculosis. Among 7,239 persons suspected and referred by physicians to clinics, sanatoria and consultants during the past four years 898 active cases were discovered.

The sale of Christmas Seals is a benefaction which appeals to everyone who desires to support a humanitarian cause, and through the efforts of the members of the A.C.T. a great many more people will this year be afforded an opportunity of contributing thereto.

Survey Of Accidents

Record Shows 22 Is Dangerous Age For Motor Driving

The dangerous age for automobile drivers is 22.

This is the information contained in a statement issued by the governor's committee on street and highway safety following a three-year study of automobile accidents in Massachusetts.

"Of all operators licensed, approximately one-seventh are 22 years of age or under. Of operators involved in fatal accidents, about one-quarter are 22 or under," according to the highways committee's statement.

"In proportion to the smaller size of this group," the committee's statement reads, "its accident record is relatively worse than the performance of the elder class to warrant special attention."

Were Good Spellers

Secretary And Teacher Defeated All Others In Match

A spelling bee was won in New York by two women who were victors in the annual Town Hall Club spelling bee. One, a private secretary, and the other, a school teacher, defeated a university professor, an editor, a foreign correspondent and a dozen others. They were Miss Lou Helmuth, the teacher, who was the first of the two sections by spelling "polyphony" and "plagiarism", and Miss Etna Kelley, the private secretary, who won on "necrophagus."

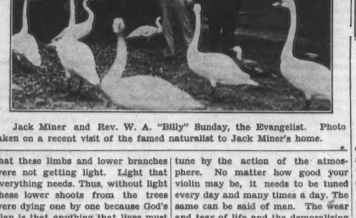
LIGHT

By MANLEY F. MINER
Son Of Jack Miner, Canadian Naturalist

While walking quietly through an evergreen grove recently my attention was drawn to the fact that the trees had grown tall and rank, and as the soil was very rich in food for such trees they were very thick, all growing straight up for light. Each one trying to poke its head out above the other, but on close examination, all the lower limbs were dead while the tops of the trees were much alive. And what was the cause? On close investigation it was revealed



Jack Miner and Rev. W. A. "Billy" Sunday, the Evangelist. Photo taken on a recent visit of the famed naturalist to Jack Miner's home.

that these limbs and lower branches were not getting light. Light that everything needs. Thus, without light these lower shoots from the trees were dying one by one because God's plan is that anything that lives must have light and heavenly food continually, or else they die and perish. And as I looked I thought of how this same example could apply to humanity. If we don't accept light and keep in tune with the infinite God, Nature, or whatever you have a mind to term it, we soon die.

Yes, man might be alive bodily but be completely dead spiritually, and unless he keeps in tune with the God, he is bound to die gradually, the same as the tree does, limb by limb as it misses the light.

After having this thought come to me, as I was alone with Nature, walking through this grove, I went home, and as I love to play my violin, picked it up, only to find it out of tune. Like all other string instruments they get quickly out of tune by the action of the atmosphere. No matter how good your violin may be, it needs to be tuned every day and many times a day. The same can be said of man. The wear and tear of life and the demoralizing atmosphere he often comes in to which sin creates, so affects his disposition that he needs to be brought into harmony with God, in tune with God every day and many times a day.

Thus man cannot live on bread alone, he must have Light and be kept in tune with God between meals.

Luminous Human Body

Story Comes From Greece Of Strange Freak Of Nature

Another luminous human body engrossing scientific attention occupied columns in the Athenian press, recently.

Anastasius Economos, a mailman at Saloniki, is the subject of this second recent discovery. In Italy recently a woman whose body was seen to give light while she slept was placed under observation in Rome. But she failed to respond.

Economos' body was said to give out sufficient rays to light a dark room.

Had Good Reason

"Yes, it is really remarkable," observed mother at the head of the table, "Clifford seems to eat twice as much chicken when we have visitors.

"Indeed!" exclaimed the lady visitor. "And, pray, why is that, Clifford?"

"'Cause that's the only time we have it!" replied the truthful lad.

Since becoming an independent state in 1831, Belgium has had but four kings.

Sea Serpent Is Sighted

Commander Of French Liner Encounters Sea Monster In Azores

Commander Sylvestre, of the French liner Cuba, officially reported to his company that a sea-serpent had been sighted from the Cuba 800 miles southwest of the Azores.

A quartermaster and two sailors corroborated the statement. The monster was from 80 to 85 feet long, shaped like a huge lizard, with a long neck topped by a tiny head, and it had two humps on its back.

It was visible, Commander Sylvestre stated, for about 30 seconds, making four leaps out of the water each time turning its head as though to view the ship.

Of late years in Scotland, the spread of bracken, particularly in the west, has reached such dimensions that it has become a serious menace to hill farming.

The grebe can fly through or under water as well as it can in the air.

Tarnish can be cleaned from copper and brass by using buttermilk.

Western Musical Development

Easterner Has Kind Words To Say Of Progress Made

Leo Smith, noted Canadian musician, who has just returned to Toronto from a Western Canadian visit, declared that "a visit to the west is an education." He said music endeavor in the west was already "productive of surprisingly good results."

"It's gratifying to note," he added "that the musical boundaries are not confined to the cities." He said while in Saskatoon persons journey from many country points to attend the music examinations.

"The results seemed to show a keenness, vitality, even at times a spontaniety, which, to my way of thinking, rather overshadowed performance of corresponding grades in the east," Mr. Smith said.

Recipes For This Week

(By Betty Barclay)

PEACH CREAM PIE

1½ cups sweetened condensed milk
¼ cup lemon juice
1 cup sliced peaches
½ cup whipping cream
2 tablespoons confectioners' sugar
Unbaked crumb crust

Blend together sweetened condensed milk, lemon juice and peaches and pour into crumb crust. Cover with whipped cream lightly sweetened and chill before serving.

To prepare Unbaked Crumb Crust: Roll enough vanilla wafers to make ¾ cup of crumbs. Cut enough vanilla wafers in halves to stand around edge of pie plate. Cover bottom of the plate with crumbs and fill in spaces between crackers. Pour in filling as usual, and cover with whipped cream.

GINGER PEAR JAM

(Using Crystalized Ginger)

4 cups (2 lbs.) prepared fruit
½ to 1 cup diced crystallized ginger
7½ cups (3¼ lbs.) sugar
1 bottle fruit pectin

To prepare fruit, peel, core, and crush completely or grind about three pounds fully ripe pears. Dice about ½ pound crystalized ginger.

Measure sugar and prepared fruit, tightly packed, into large kettle. Add ginger, mix well ,and bring to a full rolling boil over hottest fire. Stir constantly before and while boiling. Boil hard 1 minute. Remove from fire and stir in bottled fruit pectin. Then stir and skim by turns for just 5 minutes to cool slightly, to prevent floating fruit. Pour quickly. Paraffin hot jam at once. Makes about 11 glasses (6 fluid ounces each).

This product may take a week to reach a usuable set.

According to the Smithsonian Institution, there have been no major changes in outlines of the oceans and continents since earliest times.

Helen—Did you ever think seriously of marrying?

Tony—Of course I did. So I didn't!

Colonization Plan For Quebec

Legislature To Be Called Upon To Vote $10,000,000 For Purpose

Quebec's parliament will be called upon at the next session of the legislature, to vote $10,000,000 for colonization in the province, Premier L. A. Taschereau has announced.

He said there would be a "colonization congress" in the fall to be attended by bishops, colonizing missionaries and others interested in the back-to-the-land movement.

Other plans of the Quebec government call for formation of a "commission of study" to look into the question of municipalization of electricity and immediate construction of an addition to the parliament buildings on St. Augustin street, Premier Taschereau announced.

The premier made a statement in part as follows:

"Two problems summon the attention of the public: Colonization and with it back-to-the-land and the establishment of the sons of farmers, and the question of electricity.

"These are two matters which we wish to solve. Colonization is assuredly the essential work to attain our national prosperity.

"We have decided to ask the legislature at the next session to vote an amount of at least $10,000,000 to be spent entirely on colonization after a general plan by which we wish to group our settlers; acquire lands from forestry companies so as to open for the sons of farmers land in regions closed to them and then give them greater facilities for establishing themselves. With this view we will convene a colonization congress at Quebec in the fall to which we will invite our bishops, our colonizing missionaries and the apostles of the movement to consult them and receive their advice on the best manner to obtain the best results from this policy.

"But to colonization on new lands are linked intimately the back-to-the-land movement and the establishment of farmers' sons in old parishes. These latter should have a large share of the $10,000,000. There are many non-occupied lands in the province and we wish to place on them the young folks of old parishes which the lands will enable to live.

"We have inaugurated a system of paying $300 in annual contributions for $100 each to the father of a young farmer of an old parish, who convinces his son to establish himself on a vacant land. This system, of recent date, has already given excellent results and we wish to extend it further."

Canadian Economy

British Financial Paper Deals With Business Recovery Here

Canada's showing in the general world movement towards economic recovery seems to suggest that an artificially forced up commodity price level is not a necessary accompaniment to increased business, says the Financial Times of London. The paper devotes a leading article to Canadian business recovery as revealed in figures of industry, trade and finance for the first six months of the present year.

Substantial improvement in a number of the principal Canadian industries are referred to. The paper observes that the fact that recoveries of "this magnitude should be possible without the aid of governmental intervention on any scale comparable with that witnessed in the United States is a tribute to the soundness of Canadian economy."

Married Women Teachers

Achieve Better Results Than Single Teachers, Says Research Worker

Married women school teachers give their students better training, achieve better results and actually spend more time in the school rooms, according to a survey conducted by Dr. David Wilbur Peters, research worker at Columbia University.

The investigation covered the work of 1,842 teachers, half of whom were married and half single, matched for equivalence in age, training and experience. The result of the survey contradicts the assertion often repeated that married women teach only for money and teaching as a profession holds no interest, said Dr. Peters.

If an ant were enlarged to human size, and its strength increased proportionally, it could move objects weighing 120 tons.

When you and she are wed
You are made one, 'tis true,
But you will quickly learn
That one is her, not you.

WITH THE CANADIAN TEAM AT THE EMPIRE GAMES

Here are two pictures of members of the Canadian team who took part in the British Empire Games in London. On the left Prince of Wales is shaking hands with individual members of the team as they march past him at St. James' Palace. On the right, one of the Canadian coaches, Miss Rosenfeld (with white beret) is giving the girls a few hints while M. M. "Bobby" Robinson, manager of the Canadian team, looks on from the left of the group.

Scrub Pines Valuable

New Chemical Process Makes Them Suitable For Many Things

The lowly scrub pine that dots millions of acres of southern forestland, may soon provide Dixie with a source of revenue that will rival King Cotton's golden harvest.

Under the magic of experimental chemistry, the spindling "slash" pine that turpentine operators weeded out of their lands because it took soil food from the resin-producing giants, and which the lumbermen spurned as nuisances, too small for cutting, may supply the high explosive with which the next war is fought, the transparent waterproof wrapping for packages of cigarettes, the thread from which fashionable women's stockings are woven, and the paper on which your daily papers are printed.

It may lead the paper mills of America to beat a path to the sunny south, capturing an import market that annually spends $170,000,000 for paper wood pulp.

This development of an enormous new potential industry is due to the genius and persistence of Dr. C. H. Herty, a Georgia chemist, who discovered that one species of the pine tree, long regarded as too resinous for paper pulp use, could be converted under practical manufacturing conditions into a superior grade of newsprint.

The particular variety of the common southern tree, known as the "slash" pine, has a white, even wood and contains but little resin. It grows prolifically throughout the south.

A score or more of leading southern dailies recently published editions on newsprint made from the slash pine through the Herty process.

Dr. Herty's laboratory has not stopped with the discovery of slash pine as a practical source of newsprint pulp. Experiments are now in progress for converting the pulp into nitrocellulose, the basis of a vast industry that produces artificial silk, high explosives, photographic films, artificial leathers, quick-drying automobile lacquers, transparent package wrappings and countless other products.

University For Parrots

Phonograph Records Used For Teaching Language To Birds

Unique in that its students are all parrots, a "university" has been opened at Berlin. The school is international in scope, the birds being taught German, French and English. Contrary to most methods of teaching the birds, the "professor" has phonograph records made of his voice repeating the sentences that the owners desire to have drilled into their birds.

For two hours a day the bird is given his individual instruction until he is able to repeat the sentence. It generally takes about four weeks to give a parrot a vocabulary of 60 words, but longer time is required to make them respond to the proper answers.

Novel Way Of Irrigation

Farmers at Benton Harbor, Mich., one of the largest fruit and vegetable producing centres in the United States, have a novel way of irrigating their land. Canvas hose lines are placed down the rows of berries or produce, and water is pumped into them. They allow only so much of the water to escape and distribute it evenly over a wide area of land.

Studying Something New

Eighteen Boys In U.S. School Take Up Home Economics

Among those who attended the annual convention of the American Home Economics Association were four boys, members of a class of 18 boys studying home economics at Bedford high school, Bedford, Ohio. The class was founded seven years ago and is believed to be the first for boys in the country.

The boys are not effeminate by any means. All are members of their high school or football teams and are studying in their spare time all the domestic arts. They have learned how to sweep the kitchen floor, wash dishes and prepare soups, vegetables, breakfast foods, meats, potatoes and salads.

According to Victor Balitis, who was captain last year of the school's baseball team and expects to play semi-pro ball when he returns home, it is not easy to join the boys' home economics class, which is limited to eighteen. Each boy must have an average of at least 85 in all his other classes.

"Most of us play on some team," he explained. "We take the course because we want to know about that sort of stuff; it's easy and we want to know how to cook when we go camping."

Cyprus Prisons Popular

Convicts More Prosperous Than When They Are Free

Full prisons are common on the island of Cyprus. The convicts flatly refuse to be discharged. They are determined not to exchange the comfortable, well-fed and well-paid prison life for an existence of barren poverty and starvation in the villages. Prison to them represents a haven of wealth and comfort. They are paid a fixed wage while in prison, and at the end of a 12 year sentence this wage mounts up to over £50—a far larger fortune than the average peasant could ever hope to have. One discharged convict was so unwilling to leave that after a day's orgy spent dissipating his prison pay he stole a bicycle to enable him to return.

Natural gas dissolved in crude oil is believed to supply the motive power for forcing oil from the ground.

Plan Of Old Lighthouse

Antiquarians Learn How Old Beacon Was Built

The studies of two antiquarians has drawn from an old manuscript an exact description of the Alexandrian lighthouse, once the "third wonder of the world."

Miguel Asin Palacios, specialist in Arabic literature, and Lopez Otero, an architect, drew up a plan of the beacon as described in a 12th century manuscript left by Ibu Es-Sayj, a Moslem of Malaga who lived from 1132 to 1207.

The lighthouse was built on an island north of the city at a distance of 1,000 "steps" and linked to the city proper by jetties 40 feet wide, which ended in a viaduct opening into one of the doors of the lighthouse. The platform stood more than 20 feet above the level of the water and was made of huge limestone blocks hooked together and further held by melted lead poured into the interstices.

The lighthouse itself was in three sections built upon the platform and superimposed, one upon the other. The first section was square, the second octagonal, and the third cylindrical.

To Make It Rain

Oklahoma Paper Offers Prizes For The Best Suggestions

The Oklahoma City Times is offering prizes for the best letters from readers on how to make it rain. No rain had fallen in the Oklahoma City area within 40 days.

The first letter suggested the placing of large mirrors at many points over the state, "fomenting a heating process to thaw out the high pressure area in producing clouds of rain."

Prizes in the contest are a raincoat, an umbrella and a pair of rubbers.

Perfectly Good Number

"Sorry I gave you the wrong number," said the polite telephone operator.

"Don't mention it," answered the man who had made up his mind not to lose his temper. "I'm sure that the number you gave me was much better than the number I asked for. Only it just happened I wasn't able to use it."

FANCIFUL FABLES

A Very Useful Tree

Bamboo Is Very Essential To Life Of Chinese

In one sense the Chinese civilization might be said to be a civilization built on bamboo. Throughout a large part of China groves of bamboo grow like trees near the homes of the people. They eat the tender tips of bamboo as we eat asparagus, and use bamboo chopsticks to eat their food. They carry rice in bamboo baskets and sweep the floor with bamboo brooms. They learn to write on bamboo paper with bamboo pens. Houses are made with bamboo poles at the corners, woven bamboo walls and roofs. Shoes and hats are made of the same light, strong material.

Not all Chinese are rice eaters. This is a mistaken impression which gained currency because the first European ships to visit China put in at southern ports, in the rice-raising lands. Millions of Chinese, particularly those in North China and Manchuria, never see rice, but depend on the soy bean and wheat for food. But it is true that many more millions eat rice. Rice grows in very wet land, land that is generally covered with water at planting time. Each tiny rice seed is grown in a seed bed until it is about eight inches high. Then the tender shoots are transplanted in even rows in the wet fields, back-breaking work, for which the planters receive very poor pay.

One of the most interesting sights to be seen on the streets of Chinese cities is an outdoor restaurant. On a wooden bench the restaurateur places a small charcoal stove, a wooden bowl full of noodles and bean curds, chopsticks, a frying pan full of bean sprouts, and little dishes holding spices, red pepper, bean oil and syrup. Then he waits for customers. For a fraction of a cent the passer-by may obtain a quick lunch. The noodles or bean curds may be dipped in as many of the dishes of spice or syrup as he likes, or the patron may put them into a tiny bowl and pour sauces over them.

When the Chinese use chopsticks they grasp both sticks in one hand. One is held perfectly still and the other moves back and forth. The Chinese will tell you that he uses his chopsticks just as he uses his jaws—one still and one moving.

Although the Chinese have many temples in honor of great warriors—particularly those who have protected them—the common people love peace and dislike war. They have a proverb which says "Right makes might." Great men in China are often honored after death by having temples built for them. In the temples food and gifts are placed from time to time. A son in China, after the death of his parents, always places a tablet in the house in their honor. That is one reason why the Chinese are so glad when a boy baby is born, for then they will have someone to honor them after death.

Typical Of The English

Universal Respect Accorded By British To Jewish Race

Foreign visitors to this country are often surprised by the high place taken in national life by the Jews, and by the respect universally accorded to the Jewish race. For centuries this has been typical of the English. The age-old European practice of the "pogrom" has here never been a national pastime, nor a relief for over-strained nerves. In times of crisis Englishmen have never sought for an easy scapegoat and turned to Jew-baiting. The result has been that the Jews in England are loyal, worthy, and happy citizens . . . It has been said that every country gets the Jews it deserves. Britain and the Jews have always deserved well of each other. — London Evening News.

Takes Unusual Photo

Toronto Man Gets Red Portion Of Meteor Spectrum

Dr. F. M. Millman, demonstrator in astronomy at the University of Toronto, has succeeded in taking photographs of the red portion of the spectrum of a meteor.

It is believed to be the first time this has been accomplished as there are only 29 photographs of the spectrum of a meteor on astronomical record, all taken with ordinary plates which do not show the red of the spectrum.

Japan has a thunderstorm service which is particularly useful to its agriculturists. Two hundred and nineteen observation posts, manned by the employees of the various electrical companies and placed at about 121 miles apart, inform the meteorological service of the government of any threatening thunderstorms over an area of 30,000 square miles.

Agricultural Notes

Interesting Items Gleaned From Many Sources

Manitoulin Island, where the great all-turkey show is held annually, is assured of a fine crop of turkeys this year.

It is estimated that at least 3,000 lambs weekly are required to supply the retail butcher trade of Montreal. The supply is short of the demand.

The total amount of branded beef sold in Canada during the month of June was 3,497,747 pounds, an increase of 314,314 pounds on June, 1933.

The price of bacon for the domestic and overseas markets depends principally on quality, and also on volume which must be maintained at a steady flow.

It was the uniform excellence of grade A turkeys of the Canadian Poultry Pool of Western Canada that brought repeat orders from Great Britain, and this remark may also be applied to the recent export shipments of chickens.

To produce and harvest the wheat crop of the three prairie provinces by the methods used 100 years ago would require the labour of all of the farmers of Canada, their sons, and their hired men ten hours per day for a period of 113 days, or about the normal period from seed time to harvest.—Dr. J. F. Booth.

Norway (excluding Svalbard) has an area of some 125,000 square miles of which lakes and rivers occupy over 4 per cent. Of the land area of slightly over 120,000 square miles, 70 per cent. is for the most part unproductive, leaving 36,000 square miles of productive forest, pasture and arable land.

The application of modern refrigeration to fur storage has undergone rapid development in recent years with the use of freon, an odourless, safe, refrigerant, with dry coil units, which maintains uniform low temperatures essential to the preservation of life and lustre of furs.—Cold Storage News Letter, Dominion Department of Agriculture.

There is no record of the production of wheat in Canada in 1830 but in 1880 2,366,554 acres on 464,025 farms produced 32,350,452 bushels, whereas in 1930 24,898,000 acres on 738,664 farms produced 420,672,000 bushels. Thus in 50 years, the number of farms increased only about 57 per cent. while the number of acres increased about 1,000 per cent.

In the poultry work all over Canada, the Government Poultry Services of the Dominion Department of Agriculture play a leading part. These services assist farmers with the organization of pools, give direction as to the building, preparation, grading, and packing to all concerned, and inspect carloads of poultry throughout the whole of Canada.

In the 1932 honey survey of the Empire Marketing Board, Canadian honey was found stocked in eight out of the 20 principal departmental stores in London, England, and in six out of the eight chief stores of Glasgow, Scotland. Only the official brands, "Ben-List" and "Quebec" were found in Glasgow, while in London six Canadian varieties were on sale. In London, honey of a light color was preferred; in Glasgow, the slightly darker amber colored honey was more in evidence.

Free T.B. Treatment

Plan To Be Submitted To The Alberta Tax Inquiry Board

Free treatment of tuberculosis for all Alberta residents suffering from the disease, the cost to come out of general provincial taxation, is sought by the Edmonton board of health in a plan that will be submitted to the Alberta taxation inquiry board.

The taxation inquiry board is asked to recommend the plan, which is similar to the one now in operation in Saskatchewan, to the provincial government.

A considerable reduction in the number of cases was noted in Saskatchewan after the plan had been in operation two years, and it is felt that equally good results would be obtained here.

Sheep Have Intelligence

That sheep have intelligence, contrary to the general belief, is declared to have been proved recently by the leader of a flock, near Blackpool, England. While the flock was drinking from a canal one sheep fell into the water. The others scampered off, but the leader ran back to the canal, jumped into the water and pushed the drowning animal to the bank. Both scampered out and rejoined the flock.

The coffee surplus problem of Brazil sometimes is solved by using it to fire railroad engines.

HOW TO KEEP COOL

Take an effervescing glass of pleasant-tasting Andrews Liver Salt when you begin to feel the heat. At once you will feel cooler—and you'll stay cooler. Andrews not only quenches thirst, but cools your blood. Taken occasionally—say twice each week—Andrews will keep you fit by purifying your system and insuring regular and *complete* elimination. At all druggists. In tins, 35c and 60c. New, large bottle, 75c. Sole Agents: John A. Huston Co., Ltd., Toronto. 28

OCCASIONAL WIFE

By

EDNA ROBB WEBSTER

Author of "Joretta", "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Avis Werth, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarrelled. After a party at an exclusive club, when the rest of the members of the party go to a cabaret to continue the gaiety, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they quarrel. After Camilla has gone from the studio, Avis Werth calls and persuades Peter to accept a loan of $1,000. Peter finishes his exhibit and asks Avis and Camilla for suggestions as to a name for it. Camilla suggests "Eager Youth," and Avis "Inspiration". Peter adopts the latter title and Camilla, heartsick, goes to Peter's studio for quiet and to think. Peter and Avis follow later, and as the lights are turned on, see the statue has been shattered to pieces. Avis accuses Camilla of doing this, and Camilla, stunned by the disaster, and hurt and horrified by the accusation, faints.

At a subscription, Peter enters as his exhibit a statue he had sculptured especially for her as a wedding gift. They named it "Land of Hope".

Camilla's advertising campaign and Tiny Tots broadcast was a great success, and Mr. Hoyt expressed his pleasure and surprise on learning that Camilla was the author and artist who so ably stimulating business for his company.

Peter's exhibit was awarded the Paris Scholarship, and he prepares for his journey to France. After the ship's departure from New York, he is on his way to his cabin when he meets Avis Werth.

(Now Go On With The Story)

CHAPTER LVII.

Before Peter could recover from his surprise enough to speak, Avis smiled serenely and exclaimed, "Surprise, Peter!"

"Well, hello," he replied with a note of consternation in his voice. "You do have a habit of appearing at the most unexpected times and places."

"And aren't you glad to see me?" she asked in a hurt voice.

"Why, of course," he was rallying to the exigency of the moment. "As a matter of fact, I was just now headed for my cabin and wondering what I was going to do with myself on this slow-going craft for a whole week. But why in the world are you travelling on a tub like this?"

"To see that you are not lonely," she replied coyly.

"That is most considerate of you," he offered gallantly.

"Oh, but I had a selfish reason, also. I didn't want to be lonely on another boat, you see. A week with a good travelling companion can be much shorter than five days alone."

"But I didn't know you had planned to go to Europe, now."

"Neither did I until two days ago, and you were so busy with your own affairs that I just decided to make it a little surprise to you."

"No doubt about the surprise," he admitted. "What's your destination—Paris?"

"Oh, yes. Always Paris. I travel here and there about the continent when I am over there, but Paris is always home to me. You are still wondering why I am going. It happened this way: I was talking with Professor Drake the other day and he said that in his opinion my talent lies in portrait work, and that the very best thing I could do was to study with Monsieur Boule in Paris. In my enthusiasm, I decided to go at once, and then it upon the idea of taking the same boat with you, just for the fun of it. If I get over there and discover that I am not prepared to stay indefinitely, I'll take a fast boat back and start all over."

"How convenient it is to have money!" he sighed, smiling.

"You'll be like that some day," she said confidently. "But there is no sense in our standing here like this. I must see that Tillie gets us settled this afternoon; and then for a long, pleasant luxurious week. Do you like the water?"

"I think I do," Peter grinned, "but I've never before been out where it is so deep even as this."

She turned away, then hesitated. "Shall I arrange with the dining room steward to put us at the same table?"

"Why, of course. No songs in two good friends, stranded at sea on the same boat, sitting at different tables and wishing for congenial company. Or wait, I'll arrange for it, myself," he suggested on second thought. It would look better for Avis if he sought her companionship, via tips to the steward.

"Fine!" Avis agreed, and reflected that it might be clever to arrange for the information to reach Camilla that Peter had bribed a dining room steward for a table with her. One could not imagine a man falling more neatly into her plans than Peter had from the beginning. True, it was a slow and tedious campaign, but well worth the time and patience. "See you at dinner, then," she left him gayly.

For two days' notice, Avis' trunks contained a surprising collection of stunning clothes, which might have been purchased for a definite purpose. She might have been on her honeymoon, so alluring she made herself for every day and every occasion of that voyage.

By the third day, it seemed quite natural for them to face each other across the breakfast table and at the dinner table; with deck games, contract bridge in the salon, dancing in the evenings or just sitting idly side by side in their deck chairs in the calm, indolent hours between activities.

Peter was seized by a spell of inertia, so easily developed aboard a steamer, and following the strain of busy days over many months—years, in fact. It was the first time he had relaxed from anxiety and work for as long as he could remember. It was so blissful to stroll idly around or lie in a deck chair with eyes closed and caressed by the cool salt breeze, to dream without doing and to plan without action. Avis had convinced him of the wisdom of such a week of idleness. On the second day out, he had protested when she proposed a set of deck tennis.

"But I should be working, Avis. I expected to get a lot of extra things done this week."

"Aren't you the bear for work, though? Now let me tell you what would be the sensible thing for you to do, Peter. Make this week a real vacation. Forget everything except rest and a good time, and be ready to leap into Paris in full swing with new ambition. You certainly deserve one week away from your work, while at the same time it would do you a vast amount of good. You must learn to play a little." She was so anxiously concerned for his welfare that he felt a responsive desire to humor her wishes, even while he acknowledged that she probably was right about it.

It was that receptive mood induced by his complete resignation to idleness and pleasure into which Avis subtly sowed her seeds of intrigue that sprouted and flourished into a lusty romance which promised to bud and blossom.

By the third day, Camilla and America seemed vague and remote as to time and space; and Peter was luxuriating in the charm of Avis' gentle flattery, the pleasure of her gay, irresponsible manner, so different from Camilla's harrying confinement to work and ambition and obligation.

Avis captivated him in this period of lassitude and pleasure as she never had done in the atmosphere of work and ambition at the studio. She was part of this life which had seemed so unattainable to him, and she made him feel that he had only to reach out his hand and grasp it. And although the Belgrade was not the epitome of luxury and service to which she was accustomed, it seemed magnificent to Peter who had had so little ease and beauty in his life.

If Camilla's ambition had inspired him and provided him confidence, Avis' holiday mood stimulated his desire to obtain what he wanted by the shortest route, to forfeit an ounce of proud struggle for a pound of easy victory. It wasn't so much her words and actions, as her manner and the way her very thoughts willed him to her viewpoint.

There was also a full golden moon in conspiracy with wind-blown, dimly-lighted decks, in her favor. Sitting side by side, snuggled into steamer rugs, with the vastness of the heaving sea stretching about them in all directions to remind them of the insignificance of man, of the futility of waiting for life while life passed by; talking in intimate tones while the silver sheen of the moonlight and the eerie sound of the waves against the hull of the boat turned it all into a world of make-believe. Prosaic life lost its proportions of importance. It was a mood in which man tells himself that this moment, this hour, is his to do with what he will. Why wait for that which never may be, and remember that which is lost to time forever? The lure of the present is sweetly intoxicating as one partakes of more and more.

(To Be Continued)

Flying Under Difficulties

Imperial Airways Maintain Service Over Dead Sea Area

The difficulties of flying over wild areas are appreciated by H. K. Hales, Conservative M.P. for Hanley in Great Britain, who is an experienced traveller by air and he pays this compliment:

"I would like at this juncture to express my admiration for the marvellous organization which is shown by Imperial Airways Limited. They may be slow but they are sure. I think I am right in saying that there were not more than two occasions when we did not arrive at our destination on time, a thing which I greatly appreciated.

"You have to remember also that the organization of the ground forces and equipment is a great problem. In Penang they have got yet the aerodrome in order. The ground has just been laid out and levelled.

"And we must not forget the difficulties with the Persian government, which have necessitated us flying down the coast of Arabia instead of Persia and have made it necessary to cover some 200 extra miles.

"Flying over the Dead Sea with a strong down wind, we were obliged to return to a desolate tract of country to pick up petrol out of a tank placed there to meet such an eventuality. That is another little instance of how the unexpected may happen at any moment with a full load of passengers and freight for which allowances must be made, and everything done to keep the service up to time."

Of all places in the world the vicinity of the Dead Sea is not the spot to pick for a forced landing. It is hot in the valley, and although Jericho is only a few miles away, there is nothing there but a few Arab huts.—Border Cities Star.

Origin Still Uncertain

No One Really Knows First Significance Of Swastika

Some scholars believe the Swastika is merely a decorative or ornamental design, having evolved from the lotus petal pattern used in early architecture. Some say it was merely a talisman or charm, to be worked in precious metals and worn as amulet or pendant. As a mystic symbol, it is said to have been associated through the ages with fire, water, wind and rain. There are archaeologists who hold that its four points, or feet, indicate the four cardinal points of the compass. It has been interpreted as representing a flame of sacred fire, the sun in its daily rotation and a flash of lightning. Much speculation followed its adoption as the national emblem of the German Socialist party several years ago and many articles were written about it. However, its real origin and first significance are still uncertain. The final word of the swastika comes from the curator of archaeology of Smithsonian Institution. "It is the earliest known symbol or form of the cross and is undoubtedly pre-historic. The name is Sanskrit, but the symbol itself existed long before it even had a name."

Any bag, sack, box, barrel, keg, bottle, carton or other container of maize starch (including maize starch cornflour) imported into the United Kingdom is required by a new order to be conspicuously marked with the name of the country of origin.

HOLDS FALSE TEETH TIGHT AS CEMENT

Plates can't possibly slip when you sprinkle on Dr. Wernet's Powder. Largest seller in world—holds plate so tight they can't annoy you so comfortable they actually feel and act like your own. Keeps mouth sanitary, breath pleasant—special comfort-cushion prevents sensitive gums from getting sore. Small cost—any druggists.

Movies For Schools

Series Of Educational Films To Be Used In England

Completion of the first seven of a series of educational films intended to be shown in schools throughout England was revealed at a preview in London before an audience of distinguished educators.

The pictures, two and three reels in length, were made under the direction of well-known authorities in various educational lines and explanatory dialogue was provided by these experts. In schools where the auditoriums or classrooms cannot be wired for sound, special explanatory visual titles will be provided, it was explained.

The first seven films completed, which were shown to the educationists at the preview, were: "This Thistle", a complete photographic record of the growth of this plant; "Kitchencraft," production of which was supervised by experts from the National School of Cookery; "Breathing," edited by Professor Winifred Cullis, of the London School of Medicine for Women; "Wheatlands", edited by Miss Mary Field; "French," the first foreign-language educational film to be produced; "Roots," depicting the action of sensitive plant root tips in avoiding obstacles; and "Shakespeare", first of a series designed to provide a background against which famous men of literature and their ideas may be presented.

To Safeguard Drivers

Authorities May Stop Unofficial Testing Of Racing Cars

Now that the trial of Kaye Don has ended, it is stated in British racing circles that the authorities will decide to prohibit the use of racing cars and racing motorcycles on the roads out of official practice hours.

Kaye Don was sentenced by Deemster Farrant to four months' imprisonment for the manslaughter of his mechanic, Francis Taylor, while practising out of official hours for a car race.

An appeal was lodged, and after being in custody for a few hours Kaye Don was released on bail.

The authorities for many years have given a great deal of latitude to the drivers and riders from all parts of the world who come over to take part in the races.

For both the long-standing motorcycle races and the car races of the past two years there are official practice races, for which the roads are closed. In addition, a tradition has grown up that any driver or rider who wished to make additional trials could do so without any risk of serious consequences.

Defines An Actor

"Dad, what is an actor?"

"An actor? My son, an actor is a man who can walk to the side of a stage, peer into the wings filled with theatrical props, dirt and dust, other actors, stage-hands, old clothes, and other clap-trap, and say, 'What a lovely view there is from this window!'"

Before egg-grading was introduced into Canada in 1923 by the Dominion Department of Agriculture, the yearly consumption of eggs per head of the population was 17 dozen. Now it is 28 dozen.

New White Star Liner

To Be Fitted With The World's Largest Ship's Propeller

The world's largest ship's propeller has left London for Clydebank. This propeller was the first of four specially designed for Number 534 and it was shipped by the steamer "Copeland" to the Clyde where it will be fitted to the liner.

With an approximate weight of 35 tons and a spread of nearly 20 feet from tip to tip of its Manganese Bronze Blades, its shipment occasioned a great deal of ingenuity and skill. Carefully wrapped in a protective covering of sheet iron and canvas it was hoisted on board the "Copeland" by the "Hercules", one of the largest and most powerful cranes used by the Port of London authority.

Before the propeller reaches the Clyde it will make a sea journey of nearly 600 miles. To ensure that the propellers will reach the shipyard in absolute safety, they are being shipped one at a time.

A start has been made at Clydebank in painting the hull of Number 534 for the launching ceremony. When the tens of thousands of spectators assemble at Clydebank to witness the launch they will see that the huge bulk of the ship presents a glittering appearance of light grey and red. The upper part of the hull will be a light grey, whilst the undersea part will be red. Dividing the two will run the white "waterline" of the great vessel.

Scores of painters will be engaged in this task during the coming week, any many thousands of gallons of paint will be used in completing this striking transformation.

THE RHYMING OPTIMIST

By Aline Michaelis

KEY TO DREAMS

The keys on my ring are of little worth,
Leading to things well known;
But here in my hand I hold a key
Found on a paving stone.

Somewhat small for a gate, yet large for a door,
Too long for a sailor's box;
I turn it in my palm again
And wonder what it unlocks.

No symbol of all I have seen on earth
Is as potent as this to me,
And I have no words for the strange allure
Which lies in the unknown key.

Perhaps it might lead to a garden-
A hidden and lovely place;
It might open a door in a foreign land
And show me a dreamed-of face.

And never, as long as I can clasp
Closely this rain-stained key,
Will the gates of romance again be closed,
Or the door of dreams for me!

Uncover Roman Theatre

Walls Slowly Emerging From Ground In St. Albans, England

So many people are flocking to St. Albans, England, the Roman Verulamium, hoping to see the Roman theatre whose walls are slowly emerging from the ground that Lord Verulam, in charge of the excavations, has given orders to admit the public to the area every day between certain hours. All archaeologists agree that this theatre is the only example of its kind at present known in Britain. It follows the normal classical plan and possesses a oblong stage and a semi-circular auditorium, approached by staircases. The spade thus far has revealed nearly one-half of the theatre. From its proportions it is apparent that in its day it would have seated between 1,500 and 2,000 playgoers. The building appears to date from the second century A.D.

Can Recommend Canada

Earl Of Chichester Thinks It Fine For Young People

The Earl of Chichester, who sailed to England after spending seven months in the office of Sir William Clark, British High Commissioner, in Ottawa summed up his views of Canada before he sailed, as follows: "If I were asked by a young man just out of school, I should certainly recommend Canada, but I should also point out that he would have to work hard. Canada is undoubtedly a country for a young man, but he'll have to work."

If built today, ancient Roman highways, such as the Appian Way, would cost six times as much as modern improved highways.

Even the woodpecker owes his success to the fact that he uses his head.

BABY'S UPSET STOMACH Relieved!

Often in hot weather and occasionally at other times, little stomachs turn sour and acid. "When I notice any sign of sick stomach," says Mrs. J. Alphonsus Brown, Bayside, P.E.I., "I always give a Baby's Own Tablet." They quickly set things right are very easy to take and quite safe. All common ailments of childhood including teething are promptly relieved with Baby's Own Tablets. 25c a package at drug stores. 185

Dr. Williams' BABY'S OWN TABLETS

Little Helps For This Week

"I form the light and create darkness; I make peace and create evil; I the Lord do these things." Isaiah 45:7.

"All is God that is, and is to be;
And God is good." Let this suffice us still,
Resting in childlike trust upon His will,
Who moves to His great ends,
unthwarted by the ill.
—J. G. Whittier.

This then is of faith, that everything which touches us in mind, body or estate, whether brought about by this outward senseless nature or by the will of man, good or bad, is overruled to each of us by the all-holy and all-loving will of God. Whatever befalls us, however it befalls us, we must receive as the will of God. If it is through man's negligence, or ill-will, or anger, still it is to us in the very least circumstance the will of God. For if the least thing could happen to us without God's permission it would be something out of God's control. His providence and love would not be what they are. Almighty God Himself would not be the same God, not the God we believe, adore and love.—E. B. Pusey.

Novel Heating System

Specially-Treated Wallpaper Is Invention Of London Scientist

Heating system of novel design has been invented by a London scientists —working on the principle that the human body is always radiating heat to colder objects. He has invented a system which will raise the temperature of any room as high as that needed for human well-being. This will be done by specially-treated wallpaper connected to the electrical system.

At the Bee Division, Central Experimental Farm, Ottawa, it has been found that at least two months are required to lay the foundation of next year's honey crop by building up after August 1 a force of young bees capable of withstanding the rigours of the coming winter in a satisfactory manner.

Boy babies predominate in hard times, while girls lead in times of plenty, according to Professor Joseph, noted Vienna biologist.
